HOME HEALTH & PRIVATE DUTY NURSING

SUPPORTING INDIVIDUALS WITH AUTISM THROUGH PRIVATE DUTY NURSING

Compassionate, Skilled Care for All Ages

At **Adoration Home Health & Private Duty Nursing**, we understand that every individual with Autism Spectrum Disorder (ASD) has unique needs. Our dedicated **Registered Nurses (RNs) and Licensed Practical Nurses (LPNs)** provide expert in-home care that enhances **quality of life**, fosters **independence**, and ensures **health and safety** in a familiar environment.

Why Private Duty Nursing for Autism?

Individuals with autism may experience **complex medical conditions, communication challenges, and sensory sensitivities** that require specialized support. Our Private Duty Nursing services help **both children and adults** by:

- ▶ **Managing Co-occurring Medical Conditions** - Many individuals with ASD have conditions such as **epilepsy (30%), gastrointestinal disorders (50%), and sleep disturbances (80%)** that require medical monitoring (Tye et al., 2019).
- ▶ **Providing Medication Management** - Ensuring that **prescriptions, behavioral therapies, and nutritional needs** are appropriately followed at home.
- ▶ **Supporting Activities of Daily Living (ADLs)** - Assisting with **bathing, dressing, eating, and personal hygiene** while considering sensory sensitivities.
- ▶ **Preventing Hospitalizations** - Individuals with autism are at a higher risk for **emergency room visits due to uncontrolled seizures, infections, or behavioral crises** (Vohra et al., 2016). Private Duty Nurses help **reduce hospital admissions** by providing proactive in-home care.
- ▶ **Behavioral and Emotional Support** - Working alongside families and therapists to implement **individualized care plans**, reinforce **positive behaviors**, and provide **structured routines** that improve daily functioning.
- ▶ **Family Respite & Education** - Giving **caregivers a much-needed break** while also

educating families on techniques to enhance daily care, reduce anxiety, and improve communication.

The Growing Need for Autism Support

- **1 in 36 children** in the U.S. is diagnosed with autism (Maenner et al., 2023).
- Up to **40% of autistic individuals are nonverbal**, requiring alternative communication methods and specialized care (Tager-Flusberg & Kasari, 2013).
- **Over 85% of autistic adults remain unemployed** or underemployed due to lack of support services (Taylor et al., 2015).
- Adults with autism are **three times more likely** to develop chronic health conditions (Croen et al., 2015).

Private Duty Nursing **bridges the gap** between medical care and daily support, **allowing individuals to thrive at home** while alleviating the burden on families.

Why Choose Adoration Home Health & Private Duty Nursing?

- ✓ **Skilled, Compassionate Nursing Care** – Our experienced **RNs and LPNs** understand the unique challenges of autism and create **personalized care plans** that support each individual's needs.
- ✓ **24/7 Availability** – Whether **full-time care, part-time support, or overnight assistance**, we're here when you need us.
- ✓ **Insurance & Medicaid Coverage** – We **accept multiple insurance plans, including TennCare**, to help families access the care they deserve.

Get the Support You Need Today

If you or someone you love has autism and could benefit from skilled in-home nursing care, we're here to help.
