HOME HEALTH & PRIVATE DUTY NURSING

## PRIVATE DUTY NURSING: A LIFELINE FOR FAMILIES MANAGING BIRTH DEFECTS

### Compassionate Care for Children with Birth Defects

Birth defects affect 1 in every 33 babies born in the United States, with an estimated 120,000 infants impacted annually (Centers for Disease Control and Prevention [CDC], 2023). These congenital conditions often require specialized medical attention, ongoing management, and compassionate support for both the child and their family. Adoration Home Health and Private Duty Nursing provides skilled, personalized care that empowers families to focus on their child's development while we address their complex medical needs.

### How Private Duty Nursing Supports Families

Our Private Duty Nursing services are tailored to meet the unique challenges of caring for children with birth defects, including but not limited to:

- **Medical Interventions:** Assistance with tracheostomy care, ventilator management, tube feedings, and medication administration.
- **Developmental Support:** Collaboration with therapy providers to ensure alignment with physical, occupational, and speech therapy goals.
- **Family Education:** Training and resources to help families understand and manage their child's condition.
- **Care Coordination:** Communication with pediatric specialists to ensure seamless integration of medical treatments and therapies.

## Why Choose Adoration?

- **Expertise in Pediatric Care:** Our team of skilled Registered Nurses (RNs) and Licensed Practical Nurses (LPNs) are highly trained in the care of children with complex medical conditions.
- **Personalized Plans:** We work closely with families and referral sources to develop individualized care plans that prioritize the child's health and well-being.
- **Peace of Mind:** Families gain the confidence of knowing their child is in the hands of professionals who provide both exceptional care and emotional support.

## The Benefits of Private Duty Nursing

Research shows that children with birth defects who receive skilled in-home nursing care experience improved outcomes, including fewer hospitalizations and better developmental progress (Smith et al., 2021). Families also report reduced caregiver stress and an enhanced ability to focus on their roles as parents rather than full-time caregivers.

## Take the Next Step

Adoration Home Health and Private Duty Nursing is here to support your family through every step of this journey. Whether you are a healthcare provider looking to refer a patient or a parent seeking care for your child, we invite you to contact us today. Together, we can create a brighter future for children with birth defects.
